In the event that Client must designate a different Power User, Client should submit such request in writing to the Client Services representative designated on the applicable IO at least two (2) business days prior to the date upon which the new Power User requires access.

- D. Maintenance and Support.** During the term of the Contract, Client shall be entitled to receive limited maintenance and support in accordance with TechTarget's then current Standard Maintenance and Support Policy, a current version of which appears in Schedule 2. Notwithstanding the foregoing, TechTarget reserves the right, in its sole and absolute discretion, to change, modify, add, or remove any third party data, tools, widgets, services, features, add-ons, or plug-ins which are now, or in the future may be, included, integrated, or otherwise provided with the Services. The Third Party Services are specifically branded and attributed within Priority Engine to the respective Third Party Provider. The Third Party Providers retain sole and exclusive ownership of the information provided with the Third Party Services; however, these services are made available to Client by way of partnership agreements between TechTarget and the respective Third Party Providers. TechTarget makes no representations or warranties regarding the accuracy or completeness of the information provided with the Third Party Services. Client agrees that its use of the Third Party Services (i) shall not be used to violate any applicable law, (ii) shall be used solely for Client's internal business purposes (including sales and marketing), (iii) shall not be disclosed by Client to any third party, and (iv) shall at all times properly attribute the source of the information to the respective Third Party Provider. Client's use of the Third Party Services is governed by these Terms and any Documentation provided to Client. Client is responsible for ensuring that its use of the Third Party Data complies with any applicable terms of service or other agreements and that it will not alter the export coding or source attribution distinguishing TechTarget Content, including contacts, from Third Party Provider content.

### 3. Reporting

To the extent that a Campaign involves Services which include Reporting, including, but not limited to Lead Generation, Microsite Programs, and Branding Services, the terms provided in this Section 3 shall apply. In the event that Client chooses to use Third Party services in connection with reporting, such reporting will be subject to the provisions set forth in Section 4.

- A. Confirmation of Campaign Initiation.** Within two (2) business days of the Contract Start Date, TechTarget will send written confirmation to Client stating that the Services have started reporting.
- B. TechTarget Reporting**
- i. **Determination of Performance Commitments.** Client agrees that the Performance Commitment(s) referenced in the Contract (a) are representative of the quantity of deliverables which will be provided to Client over the course of the Campaign, (b) are based upon Client's marketing offers, and (c) that its marketing creative materials, specific offers, and timely provision of any required deliverables directly impact TechTarget's ability to satisfy the stated goal for Performance Commitments. Client

agrees to work with TechTarget's Client Services staff to determine mutually agreeable marketing creative and marketing offers, and to incorporate TechTarget's input into such marketing creative and marketing offers.

- ii. **Measurement of Performance Commitments.** All online Performance Commitments will be measured by TechTarget's ad servers or other applicable third-party measurement service. If TechTarget is serving the Campaign or tracking performance metrics on Client's website, TechTarget will make reporting available at least as often as weekly, either electronically or in writing, unless otherwise specified on the IO. Reports will reflect aggregate performance to date broken out by placement and summarized by creative execution, content area (Ad placement), Impressions, Clicks, spend/cost, and other variables as may be defined on the IO (e.g., keywords).
- iii. **Fulfillment of Performance Commitments.** Client will not be charged additional fees if the Performance Commitments referenced in the Contract are exceeded. For Campaigns that include a Lead guarantee of Performance Commitment, TechTarget will continue to run the specified services through the end of the stated Campaign period even if the Performance Commitments delivered are satisfied prior to the expiration of the stated Campaign period. Notwithstanding anything contained herein or in the IO to the contrary, for all Campaigns that contain a Lead guarantee Performance Commitment, the Client acknowledges and agrees that, in the event that the IO lists any specific content assets, that such assets (and the quantities thereof) are listed as examples only of components of the Campaign that TechTarget may elect to deploy in support of the Performance Commitment; provided, however, TechTarget reserves the right to determine which, and what quantities, of such assets to deploy, including the right to deploy additional or different assets in the course of the Campaign. In the event that Client delivers Client Content to TechTarget within the five (5) days preceding the Campaign Start Date, TechTarget reserves the right to deploy the Client Content early, provided that the Campaign End Date remains unchanged.

If TechTarget learns that it may not fulfill its Campaign obligations, including by not meeting the Performance Commitments by the Campaign End Date, TechTarget retains the right, in its sole discretion, to satisfy any such Campaign deficiencies by: (a) continuing to run the Campaign, or (b) running additional marketing Campaigns or services.

- iv. **Tracking Pixel.** In the event that a Campaign is based on a performance metric to be tracked on Client's website, the method for tracking the completion of the performance metric shall be set forth in the IO. TechTarget may require that Client install a tracking pixel on the confirmation page for each Ad to be delivered hereunder, to track and provide estimated live statistics for TechTarget or Third Parties who are promoting Client's Campaign on TechTarget's behalf. If Client removes or manipulates the tracking code at any time during the Campaign, without express written permission from TechTarget, TechTarget may suspend performance and, if applicable, Client agrees to pay TechTarget for the days during which the tracking code was absent or manipulated based on the average daily conversion measurements (using daily click counts and/or conversions for the seven (7) days prior to the tracking code being removed or manipulated). Client's tracking count shall be used for invoicing purposes.

## 4. Client's Use of Third Party Services

In the event that Client chooses to use third parties in connection with the Services, the following terms shall apply, as applicable.

**A. Generally**

- i. Client shall provide the identity of, and contact information for, the third party which shall be included on the IO.

**B. For Branding Services Only**

- i. **Ad Serving and Tracking.** Client may use a Third Party Ad Server provided that (a) Client designates the use of and names the Third Party Ad Server on the applicable IO, (b) Client provides TechTarget with a point of contact, including name, title, telephone number, and email address, at the respective Third Party Ad Server, and (c) Client provides TechTarget with either (i) login credentials for the Third Party Ad Server to allow TechTarget to access data or (ii) daily reporting to TechTarget. Client may utilize only third-party platforms with respect to Viewability and/or Verification that deliver Impressions in accordance with standards established by the Media Ratings Council or other equivalent and accepted industry standard ratings organization. Once approved, Client's Third Party Ad Server may not be substituted without TechTarget's prior written consent. Failure to comply with this section will, in TechTarget's sole discretion, result in (y) any guarantee being null and void or (z) reliance by TechTarget solely on the Controlling Measurement (as hereinafter defined).
- ii. **Controlling Measurement.** If both Parties are tracking delivery, the measurement used for invoicing ("**Controlling Measurement**") will be determined as follows:
  - a. Except as otherwise specified herein, the Controlling Measurement will be taken from an ad server that is certified as compliant with the IAB/AAAA Ad Measurement Guidelines (the "**IAB/AAAA Guidelines**").
  - b. If both ad servers are compliant with the IAB/AAAA Guidelines, the Controlling Measurement will be the Third Party Ad Server, as long as it provides an automated, daily reporting interface which allows for automated electronic delivery of relevant and non-proprietary statistics to TechTarget in a form and manner that is approved by TechTarget; provided, however, that TechTarget must receive access to such interface in the timeframe as set forth in Section 4(B)(iii).
  - c. If neither Party's ad server is compliant with the IAB/AAAA Guidelines, or the requirements in sub-section (b), above, cannot be met, the Controlling Measurement will be based on TechTarget's ad server.
- iii. **Ad Server Reporting Access.** As available, the Party responsible for the Controlling Measurement will provide the other Party with online or automated access to relevant and non-proprietary statistics from the ad server within one (1) day after the Ads go live. The other Party will notify the Party with the Controlling Measurement if such Party has not received such access. If such online or automated reporting is not available, the Party responsible for the Controlling Measurement will provide placement-level activity reports to the other Party in a timely manner, as mutually agreed to by the Parties, in the case of Ads being served by TechTarget. If both Parties have tracked the Campaign from Campaign Start Date and the Party responsible for the Controlling Measurement fails to provide such access or reports as described herein, then the other Party may use or provide its ad server statistics as the basis of calculating Campaign delivery for invoicing.

- iv. **Discrepant Measurement.** If the difference between the Controlling Measurement and the other measurement exceeds ten percent (10%) over the invoice period and the Controlling Measurement is lower, the Parties will facilitate a reconciliation effort between TechTarget and Third Party Ad Server measurements. If the discrepancy cannot be resolved through good faith efforts by both Parties, then Client reserves the right to either (i) consider the discrepancy an under-delivery of the deliverables as described in Section 4(B)(vii), whereupon the Parties will act in accordance with that section, including the requirement that Client and TechTarget make an effort to agree upon the conditions of a makegood flight and delivery of any makegood will be measured by the Third Party Ad Server, or (ii) the Parties will come to a mutual agreement as to the total number of Impressions served (the “**Adjusted Controlling Measurement**”) and Client shall pay an invoice based on the Adjusted Controlling Measurement.
- v. **Measurement Methodology.** TechTarget will make reasonable efforts to publish, and Client will make reasonable efforts to cause the Third Party Ad Server to publish, a disclosure in the form specified by the IAB and AAAA regarding their respective ad delivery measurement methodologies with regard to compliance with the IAB/AAAA Guidelines.
- vi. **Third Party Ad Server Malfunction.** Where Client is using a Third Party Ad Server and that Third Party Ad Server cannot serve the Ad, Client will have a one-time right to temporarily suspend delivery under the IO for a period of up to seventy-two (72) hours. Upon written notification by Client of a non-functioning Third Party Ad Server, TechTarget will have twenty four (24) hours to suspend delivery. Following that period, Client will not be held liable for payment for any Ad that runs within the immediately following seventy-two (72)-hour period until TechTarget is notified that the Third Party Ad Server is able to serve Ads. After the seventy-two (72)-hour period passes and Client has not provided written notification that TechTarget can resume delivery under the IO, Client will pay for the Ads that would have run, or are run, after the seventy-two (72)-hour period but for the suspension, and can elect TechTarget to serve Ads until the Third Party Ad Server is able to serve Ads. If Client does not so elect for TechTarget to serve the Ads until Third Party Ad Server is able to serve Ads, TechTarget may use the inventory that would have been otherwise used for TechTarget’s own advertisements or advertisements provided by a Third Party.

Upon notification that the Third Party Ad Server is functioning, TechTarget will have seventy-two (72) hours to resume delivery.

vii. **Makegoods**

- a. **Notification of Under-delivery.** TechTarget will monitor delivery of the Ads, and will notify Client in writing as soon as possible if it believes that an under-delivery is likely. In the case of a probable or actual under-delivery, the Parties may arrange for a makegood consistent with the Contract.
- b. **Makegood for Reporting Failure.** Client will provide TechTarget with written notice of any Reporting Failures within fifteen (15) business days of receipt of the Deliverable. TechTarget will cure such Reporting Failure within five (5) business days of receipt of such notice.
- c. **Makegood Procedure.** If deliverables fall below guaranteed levels, as set forth on the IO, or if there is an omission of any Ad, the Parties will use commercially reasonable efforts to agree upon the conditions of a makegood flight, either on the IO or at the time of the shortfall.
